

Hemlock Raised Beds

Wilson Home Farms installs handcrafted Hemlock Raised Beds built from rough-cut, true width lumber (not that small stuff you see at the box stores).

Each bed is built with naturally rot resistant local Hemlock and secured with 1/2" Lag Bolts. All beds are offered at 8', 10' or 12' long at a variety of heights.

Price includes fill (50% Compost, 50% Topsoil) and installation. Fencing and irrigation can be added to any model.
